

What's your

MOLOTM ?

What could you use **More Of**, **Less Of**?

MORE: dependable vendors, time, and money for high priority needs?

LESS: costs, paperwork, and unhappy surgeons due to broken or unavailable instruments?

With expertise in mechanical, electrical, materials, optical, and applied engineering, IMS' research team designs each repair protocol to ensure that when your device or instrument is returned to you, it will meet the relevant engineering industry standards.

IMS has solutions to help you:

- Reduce costs
- Eliminate unnecessary administrative work
- Manage and repair your surgical instruments and devices
- Ensure your instruments are ready — clean, sterile, functional, and available — when your surgeons are ready to operate

With IMS, you get more of what you need, less of what you don't.

So, what's your **MOLO**?
